

## **Cryodyn™ solves the offshore ship-to-ship LNG transfer challenge**

- Nexans Cryoflex system: vacuum insulated flexible pipes for LNG transfer
- Double pipe: double safety and super insulated
- Ship-to-ship: tandem and side-by-side
- Ship-to-shore: simple and safe
- LNG flow speed up to 12 m/s.
- 10", 16" and 20" inner diameter, length according to request
- Aerial and submerged
- Ship-to-ship transfer system 'OCT' developed in co-operation with Framo Engineering and Seaflex
