## **Nexans Supplies 3.3 Million Euros Worth of Cable to PESA for Warsaw's New Swing-type Trams**

Mönchengladbach and Nuremberg plants set to produce more than 3,000 km of cable and cabling systems for 186 trams

**Moenchengladbach (Germany), 5 August 2010** – The Rolling Stock division of Nexans Deutschland GmbH is to produce more than 3,000 km of cable for Warsaw's new trams by the end of 2012 in its Moenchengladbach and Nuremberg plants. Nexans Polska Sp. z o.o. (Racibórz) recently received the order which is worth 3.3 million euros. The customer is Poland's largest manufacturer of rail vehicles, PESA Bydgoszcz SA, which is headquartered in Bydgoszcz, Poland. PESA is to install the energy and electronics cables in 186 trams destined for tram operator, Tramwaje Warszawskie.

The Polish capital is modernising its tram fleet as part of its preparations to meet the run of football fans attending the UEFA EURO 2012 matches: some of the low-floor trams, which are equipped with air conditioning, CCTV systems and extendable ramps for children's buggies and wheelchairs etc., are expected to be in use even before the EURO begins. The last tram is set to be delivered by the end of 2013.

More than 3,000 km of cable and cabling systems produced in Nexans plants in Moenchengladbach and Nuremberg are to be installed in the 186 Swing-type city trams, produced by the Polish company PESA for Warsaw's tram operator. This equates to 16 km per tram, i.e. approximately ten times the amount of cable used in a car. On the other hand, each tram can accommodate approximately 200 passengers. (Photo: PESA)

## **About Nexans Deutschland**

Nexans Germany is one of the leading cable manufacturers in Europe. The company is offering an extensive range of high performance cables, systems, and components for the telecommunications and energy sectors, rounded off by superconducting materials and components, Cryoflex transfer systems and special machinery for the cable industry. Producing at manufacturing plants with 5.980 employees in Germany and abroad, the sales in 2009 amounts to approx. 642 Mio Euro. The full integration into the Nexans Group Nexans Germany also benefits from excellent opportunities to use the available synergies in all corporate fields, which not only applies to worldwide projects but also to research and development, the exchange of know how, and to other areas.
