

Company profile of Nexans Power Accessories Germany GmbH

Specialist for cable accessories and cabling technology

Nexans Power Accessories Germany GmbH has been a leader in pre-assembled cable accessories for more than 50 years. The company, a merger of GPH GmbH and Euromold GmbH, is part of the Nexans Power Accessories Business Group and is represented in more than 40 countries worldwide.

The strength of NPAG lies in its collaboration with the "best in the industry". As such, its intensive research and development activities are backed by the entire Nexans Group, a worldwide leader in power cables.

The Nexans group is a global player in the infrastructure, industry, building and Local Area Network markets. With energy as the basis of its development, Nexans, the worldwide leader in the cable industry, offers an extensive range of cables and cabling systems and addresses a series of market segments: From energy, transport and telecom networks to shipbuilding, oil and gas, nuclear power, automotives, electronics, aeronautics, material handling and automation.

Nexans Power Accessories Germany GmbH is specialized in manufacturing of low and medium voltage accessories as well as mechanical connectors and cable lugs. It is also able to offer customer-specific high-voltage ferrules and lugs.

In the headquarters in Hof, Ferdinand-Porsche-Straße 12, the GPH standard product range of compression or mechanical connectors and cable lugs is developed and produced as well as customized solutions.

At the second location, Uferstraße 41, the focus concentrates on kitting of cable accessories and manufacturing of customized jumper cables.

With its brand Euromold the NPAG provides a complete range of accessories for underground cables: Pre-moulded EPDM or terminations and joints for cables and epoxy bushings for transformers and switchgears, as well as a large range of cold-shrinkable and heat-shrinkable terminations and joints from 12 to 42 kV. The product range is completed by specialized installation tooling.

NPAG accessories have set industrial and European standards. Quality- and environmental awareness are central components of the corporation philosophy and management system. As a result of an appropriate specification of the company's essential processes work flow will be well-regulated and flexibility supported. This enables a dynamic process control, is raising the ability to respond by changes and provides finally the basis for customer satisfaction.
