**Nexans Ref.:** N441.2MBP

- Blind plate to fill up unused positions in the Plug&Play Optical Patch Panel

## DESCRIPTION

The Nexans' Plug and Play patch panel can hold up to 4 MPO modules.

Often these 4 positions are not completely filled up at the start of a data center, but kept for possible extensions in the rack.

The blind plates are then used to give the patch panel a finished look.

**LANmark-OF**

## STANDARDS

**International ISO/IEC 11801**

All drawings, designs, specifications, plans and particulars of weights, size and dimensions contained in the technical or commercial documentation of Nexans is indicative only and shall not be binding on Nexans or be treated as constituting a representation on the part of Nexans.
