- Highly effective at removing dust contaminants
- Dry cloth cleaning tool for MPO connectors
- To clean multi-fibres male connectors residing in an adaptor
- To clean unmated connectors
- Simple to use

DESCRIPTION

- Dry cloth cleaning tool with cleaning micro fibres. Fibres are densely stranded and debris free.
- Highly effective at removing oil and dust contaminants that can negatively impact optical performance.
- Designed for MPO connectors.
- Designed to clean both the female connector of the MPO Pre-Term and the male connector inside the Plug&Play module.
- Dust cap of the cleaner acts as an adaptor for cleaning unmated connectors.
- To clean single fibre connectors residing in an adaptor.
- Extendable tip reaches recessed connectors.
- Simple to use.
- Easy pushing motion engages and initiates cleaning.
- Disposable with 525+ cleanings per unit.
- Cleaning rotates 180° for a full sweep.
- Audible click when engaged.
